SoFi Carbon*Explorer*

Get started with high-performance
carbon management and reporting
for the Carbon Disclosure Project

CARBON DISCLOSURE PROJECT
ACCREDITED PROVIDER

Fast-track carbon management and Carbon Disclosure Project (CDP) reporting: SoFi CarbonExplorer combines a proven software solution with leading carbon consulting to help you initiate a high-performance carbon management program in two months.

Carbon management has become a strategic focus for leading companies around the world. But only through performance-oriented monitoring and reporting can you effectively understand your current position, improve results, and demonstrate the business value of your greenhouse gas management program.

Get started

Getting started or advancing your carbon management efforts can be challenging: resource constraints, lack of internal expertise, dispersed or incomplete data, isolated carbon reduction efforts and lack of a clear strategy are often barriers to high-performance carbon management.

SoFi CarbonExplorer addresses these challenges and is the ideal solution to initiate a leading carbon management and reporting program for your company in two months.

SoFi CarbonExplorer makes it easy

- A dedicated carbon expert provides guidance on greenhouse gas accounting and reporting to help you maximize the value-add to company objectives.
- An easy-to-use software solution enables you to identify climate risks and opportunities by tracking all the critical greenhouse gas indicators.

The software is based on PE's leading SoFi Solution and incorporates the latest CDP questionnaire and guidance.

SoFi Software
CORPORATE SUSTAINABILITY

SoFi – the most widely used software solution for corporate sustainability management:

JAN DALSGAARD JOHANNESSEN, CORPORATE ENVIRONMENTAL MANAGER,
ARLA FOODS AMBA

Additional consulting services

Climate change risks and opportunities
Understanding how your company might be affected by climate change is at the basis of successful carbon management. Learn about latest insights and recent global trends in a customized workshop for your company.

»» **The high quality SoFi Software solutions from our gold carbon calculation partner PE INTERNATIONAL have been tested by an independent third party and meet CDP standards of greenhouse gas emissions calculation. CDP is delighted to recommend the SoFi Software solutions in helping companies to measure and manage carbon performance effectively.**«

PAUL SIMPSON, CHIEF EXECUTIVE OFFICER, CARBON DISCLOSURE PROJECT

Why SoFi CarbonExplorer?

Your benefits from the unique combination of a proven software solution and expert consulting services:

Easy Access – no software implementation required. Manage your information with secure web-access and guidance from an experienced consultant.

Solid Basis – your greenhouse gas management and reporting program will be solid, reliable and will deliver superior performance.

Speed and Confidence – in two months you initiate a leading carbon management program and respond to the Carbon Disclosure Project questionnaire with confidence.

Efficiency – data collection and reporting for your organization will be highly efficient and you can focus on identifying opportunities to increase energy efficiency and optimize resource use.

Cost-Effectiveness – the packaged price is transparent and includes planning and implementation of your solution according to the highest quality standards.

Scalability – easily upgrade and scale your carbon management solution to include additional sustainability performance features and consulting packages specific to your needs.

SoFi CarbonExplorer – Solution Overview

SoFi CarbonExplorer services

- Kick-off workshop defining goals, actions and timelines
- Guidance from a senior carbon management consultant on best practice
- Training and support for software users
- Final workshop presenting results and benchmarking against industry peers

SoFi CarbonExplorer software features

- A central information platform with all the relevant greenhouse gas indicators from the latest CDP questionnaire
- Calculation of Scope 1 and 2 emissions as well as provision for Scope 3 reporting in line with CDP requirements and GHG Protocol standards
- Built-in emission factors according to CDP requirements and guidance
- Export template for CDP questionnaire response
- Plausibility checks and a complete audit trail for external verification
- Four-month software license included (upgrade options available)

Carbon strategy for your company

Respond effectively to climate change and deliver results: PE can support you in developing and implementing your unique carbon strategy.

Scope 3 – know your corporate value chain emissions

Learn how you can enhance your carbon management through Scope 3 accounting, and receive comprehensive guidance on implementing the new GHG Protocol standard.

Software solution upgrades

Upgrade your software license with various Software-as-a-Service or licensing options. Or scale your software solution to include environmental resource management, sustainability performance management, supply chain sustainability assessment and other topics.

Experts in Sustainability – About PE INTERNATIONAL AG

PE INTERNATIONAL AG is a leading provider of sustainability management software and expert consulting services. For more than 20 years, PE's enterprise sustainability solutions have enabled businesses to understand their impact on the environment, improve company performance and succeed in the market place. PE INTERNATIONAL AG has 15 offices across the globe and more than 1,000 customers.

Walking the Talk: Carbon Management at PE INTERNATIONAL

At PE INTERNATIONAL we are engaged in a number of initiatives aimed at setting and further developing standards in the areas of carbon accounting and reporting, both for product and corporate applications. Our senior staff are involved in the development of key global standards such as the Greenhouse Gas Protocol Initiative. Our software was independently certified as meeting all the corporate reporting criteria set by the Carbon Disclosure Project (CDP) and we were therefore selected to be CDP's first carbon calculation partner. As a 'Gold Partner', we are proud to be engaged in the further development of CDP's carbon reporting requirements.

In addition to these involvements, we are active in a number of other carbon accounting and reporting initiatives and programs on a regional and country level.

PE INTERNATIONAL has been carbon neutral since 2006. This has been achieved by applying the sustainability principles of avoidance and reduction prior to offsetting any remaining emissions with high-quality certificates. This approach also conforms to the principles of the new carbon neutrality standard PAS 2060. We are strongly motivated to further improve our own performance.
